

Meeting Dec 1, 2021

Today for our meeting, we decided to continue on working on the html page. We discussed what our html page should look and interact like. We have made a lot of progress from before. We have added in checkboxes for the user to interact with the website, We have also added the feature to click on a champion and that pops up a close up of the champion image and tabs of that specific champion info. Reference of our website design below, where we have a champion image and that image pops up into a close up image and tabs below for that champion.
